

REDUCING CAUTI

(Catheter-Associated Urinary Tract Infections)

Dr. Caitlin Eccles-Radtke, MD, Dr. Chad Richardson
Lynelle Scullard, RN, Sarah Edwardy, RN, Janelle Kummro, and Mary Hassler
Hennepin County Medical Center (HCMC)

Leaders and clinicians from HCMC will discuss improvement efforts made through the work of nurses and physicians in the reduction of Catheter-Associated Urinary Tract Infections (CAUTI) at Hennepin County Medical Center in Minneapolis, Minnesota. The discussion will include how they used data plotted on run charts that was used to drive the conversation about the catheter and if it can be removed. The nursing staff have made this a habit during their multi-disciplinary rounds, and they've gotten comfortable removing catheters that would not have believed a year ago could in fact be removed. The team went 99 days without a CAUTI, down from 1-3 per month.

Free webinar hosted by Institute for Enterprise Excellence on Tuesday, November 21, 2017 at 2:00 pm CT zone.

IEX Webinar - Reducing CAUTI at HCMC
Tue, Nov 21, 2017 2:00 PM - 3:00 PM CST
